

News Release

HESS REPORTS ESTIMATED RESULTS FOR THE SECOND QUARTER OF 2023

Key Developments:

- Sanctioned development of Uaru, the fifth development on the Stabroek Block, offshore Guyana, with a production capacity of approximately 250,000 gross barrels of oil per day (bopd); first oil is expected in 2026
- Extension granted for the Stabroek Block exploration license by one year to October 2027
- Oil discovery at the Pickerel-1 exploration well in the Gulf of Mexico, which will be a tieback to the Tubular Bells production facility with first oil expected in mid-2024

Second Quarter Financial and Operational Highlights:

- Net income was \$119 million, or \$0.39 per share, compared with net income of \$667 million, or \$2.15 per share, in the second quarter of 2022; adjusted net income¹ in the second quarter of 2023 was \$201 million, or \$0.65 per share
- Oil and gas net production was 387,000 barrels of oil equivalent per day (boepd), up 28% from 303,000 boepd, proforma for asset sold, in the second quarter of 2022
- Bakken net production was 181,000 boepd, up 29% from 140,000 boepd in the second quarter of 2022; Guyana net production was 110,000 bopd, compared with 67,000 bopd in the prior-year quarter
- E&P capital and exploratory expenditures were \$933 million compared with \$622 million in the prior-year quarter

2023 Updated Guidance:

• Full year net production is now forecast to be in the range of 385,000 boepd to 390,000 boepd, compared with previous guidance of 365,000 boepd to 375,000 boepd primarily due to strong operational performance and the expected startup of the Payara development early in the fourth quarter

NEW YORK, July 26, 2023 — Hess Corporation (NYSE: HES) today reported net income of \$119 million, or \$0.39 per share, in the second quarter of 2023, compared with net income of \$667 million, or \$2.15 per share, in the second quarter of 2022. On an adjusted basis, the Corporation reported net income of \$201 million or \$0.65 per share in the second quarter of 2023. The decrease in adjusted after-tax results compared with the prior-year quarter reflects lower realized selling prices, partially offset by the net impact of higher production volumes in the second quarter of 2023.

^{1. &}quot;Adjusted net income" is a non-GAAP financial measure. The reconciliation to its nearest GAAP equivalent measure, and its definition, appear on pages 6 and 8, respectively.

CEO John Hess said: "We continue to successfully execute our strategy to deliver industry leading cash flow growth and financial returns to our shareholders while safely and responsibly producing oil and gas to help meet the world's growing energy needs."

After-tax income (loss) by major operating activity was as follows:

Exploration and Production:

E&P net income was \$155 million in the second quarter of 2023, compared with \$723 million in the second quarter of 2022. On an adjusted basis, E&P second quarter 2023 net income was \$237 million. The Corporation's average realized crude oil selling price, including the effect of hedging, was \$71.13 per barrel in the second quarter of 2023, compared with \$99.16 per barrel in the prior-year quarter. The average realized natural gas liquids (NGL) selling price in the second quarter of 2023 was \$17.95 per barrel, compared with \$40.92 per barrel in the prior-year quarter, while the average realized natural gas selling price was \$3.82 per mcf, compared with \$6.45 per mcf in the second quarter of 2022.

Net production was 387,000 boepd in the second quarter of 2023, compared with 303,000 boepd, proforma for asset sold, in the second quarter of 2022, primarily due to higher production in Guyana and the Bakken.

Cash operating costs, which include operating costs and expenses, production and severance taxes, and E&P general and administrative expenses, were \$13.97 per barrel of oil equivalent (boe) in the second quarter of 2023, compared with \$14.56 per boe, proforma for asset sold, in the prior-year quarter. The decrease in cash operating costs reflects the higher production volumes, partially offset by higher workover activity in the Gulf of Mexico.

Operational Highlights for the Second Quarter of 2023:

Bakken (Onshore U.S.): Net production from the Bakken was 181,000 boepd in the second quarter of 2023 compared with 140,000 boepd in the prior-year quarter, reflecting increased drilling and completion activity, higher NGL and natural gas volumes received under percentage of proceeds contracts due to lower commodity prices, and higher uptime after weather related shut-ins in the prior-year quarter. NGL and natural gas volumes received under percentage of proceeds contracts were 22,000 boepd in the second quarter of 2023 compared with 7,000 boepd in the second quarter of 2022 due to lower realized NGL and natural gas prices increasing volumes received as consideration for gas processing fees. During the second quarter of 2023, the Corporation drilled 32 wells, completed 28 wells, and brought 30 new wells online. Bakken net production is forecast to be in the range of 175,000 boepd to 180,000 boepd for the full year 2023, up from our previous guidance range of 165,000 boepd to 170,000 boepd.

Gulf of Mexico (Offshore U.S.): Net production from the Gulf of Mexico in the second quarter of 2023 was 32,000 boepd, compared with 29,000 boepd in the prior-year quarter.

In July 2023, the Pickerel-1 exploration well (Hess – 100%) located in Mississippi Canyon Block 727 was an oil discovery. The well encountered approximately 90 feet of net pay in high quality, oil bearing, Miocene age reservoir. Planning is underway to tie-back the well to the Tubular Bells production facility with first oil expected in mid-2024.

Guyana (Offshore): At the Stabroek Block (Hess – 30%), net production from the Liza Destiny and the Liza Unity floating production, storage and offloading vessels (FPSOs) totaled 110,000² bopd in the second quarter of 2023 compared with 67,000² bopd in the prior-year quarter. The Liza Unity FPSO, which commenced production in February 2022, reached its production capacity of approximately 220,000 gross bopd in July 2022. In the second quarter of 2023, we sold nine cargos of crude oil from Guyana compared with six cargos in the prior-year quarter. Net production guidance for Guyana for the full year 2023 is expected to be approximately 115,000² bopd, compared to our previous guidance range of 105,000 bopd to 110,000 bopd.

The third development, Payara, with a production capacity of approximately 220,000 gross bopd, remains on track for startup early in the fourth quarter. The fourth development, Yellowtail, was

sanctioned in April 2022 with a production capacity of approximately 250,000 gross bopd and first production expected in 2025. The fifth development, Uaru, was sanctioned in April 2023 with a production capacity of approximately 250,000 gross bopd and first production expected in 2026.

The expiration of the exploration license for the Stabroek Block was extended one year from October 2026 to October 2027, and the end of the first renewal period of the exploration license, which requires the relinquishment of 20% of the acreage not held by discoveries, was extended one year from October 2023 to October 2024, both as a result of force majeure due to the COVID-19 pandemic.

Southeast Asia (Offshore): Net production at North Malay Basin and JDA was 64,000 boepd in the second quarter of 2023 compared with 67,000 boepd in the prior-year quarter.

Canada (Offshore): The operator, BP Canada, drilled the Ephesus exploration well, offshore Newfoundland (Hess – 25%) in the second quarter of 2023. The well did not encounter commercial quantities of hydrocarbons and well costs incurred of \$36 million were recorded to exploration expense.

Midstream:

The Midstream segment had net income of \$62 million in the second quarter of 2023, compared with net income of \$65 million in the prior-year quarter.

During the second quarter of 2023, the Corporation received total net proceeds of \$217 million from the public offering of approximately 6.4 million Hess Midstream LP (HESM) Class A shares held by the Corporation in May 2023 and the repurchase by Hess Midstream Operations LP (HESM Opco), a consolidated subsidiary of HESM, of approximately 1.7 million HESM Opco Class B units held by the Corporation in June 2023. The repurchase of the Class B units was financed by HESM Opco's revolving credit facility. After giving effect to the above transactions, the Corporation owns approximately 38% of HESM on a consolidated basis.

Corporate, Interest and Other:

After-tax expense for Corporate, Interest and Other was \$98 million in the second quarter of 2023, compared with \$121 million in the second quarter of 2022. Corporate and other expenses decreased by \$18 million in the second quarter of 2023 primarily due to higher interest income. Interest expense decreased by \$5 million in the second quarter of 2023 reflecting higher capitalized interest.

Capital and Exploratory Expenditures:

E&P capital and exploratory expenditures were \$933 million in the second quarter of 2023 compared with \$622 million in the prior-year quarter, primarily due to development activities in Guyana and higher drilling activity in the Bakken. Midstream capital expenditures were \$52 million in the second quarter of 2023 and \$72 million in the prior-year quarter.

Liquidity:

Excluding the Midstream segment, Hess Corporation had cash and cash equivalents of \$2.2 billion and debt and finance lease obligations totaling \$5.6 billion at June 30, 2023. The Midstream segment had cash and cash equivalents of \$4 million and total debt of \$3.1 billion at June 30, 2023. The Corporation's debt to capitalization ratio as defined in its debt covenants was 35.1% at June 30, 2023 and 36.1% at December 31, 2022.

Net cash provided by operating activities was \$974 million in the second quarter of 2023, compared with \$1,509 million in the second quarter of 2022. Net cash provided by operating activities before changes in operating assets and liabilities³ was \$974 million in the second quarter of 2023, compared with \$1,463 million in the prior-year quarter.

^{2.} Net production from Guyana in the second quarter of 2023 included 13,000 bopd of tax barrels. There were no tax barrels in the second quarter of 2022. Net production guidance for Guyana for the full year 2023 includes tax barrels of approximately 15,000 bopd.

^{3. &}quot;Net cash provided by (used in) operating activities before changes in operating assets and liabilities" is a non-GAAP financial measure. The reconciliation to its nearest GAAP equivalent measure, and its definition, appear on pages 7 and 8, respectively.

Items Affecting Comparability of Earnings Between Periods:

The following table reflects the total after-tax income (expense) of items affecting comparability of earnings between periods:

	Three Months Ended June 30, (unaudited)			Six	June	ns Ended e 30, dited)		
	2023		2022		20	2023		2022

Midstream		_		_		_		_
Corporate, Interest and Other								13
Total items affecting comparability of earnings between periods	\$	(82)	\$		\$	(82)	\$	13

Second Quarter 2023: E&P results include a charge of \$82 million (\$82 million after income taxes) that resulted from updates to the Corporation's estimated abandonment obligations in the West Delta Field in the Gulf of Mexico. These abandonment obligations were assigned to the Corporation as a former owner after they were discharged from Fieldwood Energy LLC as part of its approved bankruptcy plan in 2021.

Reconciliation of U.S. GAAP to Non-GAAP Measures:

The following table reconciles reported net income attributable to Hess Corporation and adjusted net income:

Hess Corporation will review second quarter financial and operating results and other matters on a webcast at 10 a.m. today (EDT). For details about the event, refer to the Investor Relations section of our website at **www.hess.com**.

Hess Corporation is a leading global independent energy company engaged in the exploration and production of crude oil and natural gas. More information on Hess Corporation is available at www.hess.com.

Forward-looking Statements

This release contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Words such as "anticipate," "estimate," "expect," "forecast," "guidance," "could," "may," "should," "believe," "intend," "project," "plan," "predict," "will," "target" and similar expressions identify forward-looking statements, which are not historical in nature. Our forward-looking statements may include, without limitation: our future financial and operational results; our business strategy; estimates of our crude oil and natural gas reserves and levels of production; benchmark prices of crude oil, NGL and natural gas and our associated realized price differentials; our projected budget and capital and exploratory expenditures; expected timing and completion of our development projects; information about sustainability goals and targets and planned social, safety and environmental policies, programs and initiatives; and future economic and market conditions in the oil and gas industry.

Forward-looking statements are based on our current understanding, assessments, estimates and projections of relevant factors and reasonable assumptions about the future. Forward-looking statements are subject to certain known and unknown risks and uncertainties that could cause actual results to differ materially from our historical experience and our current projections or expectations of future results expressed or implied by these forward-looking statements. The following important factors could cause actual results to differ materially from those in our forward-looking statements: fluctuations in market prices of crude oil, NGL and natural gas and competition in the oil and gas exploration and production industry; reduced demand for our products, including due to perceptions regarding the oil and gas industry, competing or alternative energy products and political conditions and events; potential failures or delays in increasing oil and gas reserves, including as a result of unsuccessful exploration activity, drilling risks and unforeseen reservoir conditions, and in achieving expected production levels; changes in tax, property, contract and other laws, regulations and governmental actions applicable to our business, including legislative and regulatory initiatives regarding environmental concerns, such as measures to limit greenhouse gas emissions and flaring, fracking bans as well as restrictions on oil and gas leases; operational changes and expenditures due to climate change and sustainability related initiatives; disruption or interruption of our operations due to catastrophic and other events, such as accidents, severe weather, geological events, shortages of skilled labor, cyber-attacks, public health measures, or climate change; the ability of our contractual counterparties to satisfy their obligations to us, including the operation of joint ventures under which we may not control and exposure to decommissioning liabilities for divested assets in the event the current or future owners are unable to perform; unexpected changes in technical requirements for constructing, modifying or operating exploration and production facilities and/or the inability to timely obtain or maintain necessary permits; availability and costs of employees and other personnel, drilling rigs, equipment, supplies and other required services; any limitations on our access to capital or increase in our cost of capital, including as a result of limitations on investment in oil and gas activities, rising interest rates or negative outcomes within commodity and financial markets; liability resulting from environmental obligations and litigation, including heightened risks associated with being a general partner of HESM; and other factors described in Item 1A-Risk Factors in our Annual Report on Form 10-K and any additional risks described in our other filings with the Securities and Exchange Commission (SEC).

As and when made, we believe that our forward-looking statements are reasonable. However, given these risks and uncertainties, caution should be taken not to place undue reliance on any such forward-looking statements since such statements speak only as of the date when made and there can be no assurance that such forward-looking statements will occur and actual results may differ materially from those contained in any forward-looking statement we make. Except as required by law, we undertake no obligation to publicly update or revise any forward-looking statements, whether because of new information, future events or otherwise.

Non-GAAP financial measures

The Corporation has used non-GAAP financial measures in this earnings release. "Adjusted net income" presented in this release is defined as reported net income attributable to Hess Corporation excluding items identified as affecting comparability of earnings between periods. "Net cash provided by (used in) operating activities before changes in operating assets and liabilities" presented in this release is defined as Net cash provided by (used in) operating activities excluding changes in operating assets and liabilities. Management uses adjusted net income to evaluate the Corporation's operating performance and believes that investors' understanding of our performance is enhanced by disclosing this measure, which excludes certain items that management believes are not directly related to ongoing operations and are not indicative of future business trends and operations. Management believes that net cash provided by (used in) operating activities before changes in operating assets and liabilities demonstrates the Corporation's ability to internally fund capital expenditures, pay dividends and service debt. These measures are not, and should not be viewed as, a substitute for U.S. GAAP net income or net cash provided by (used in) operating activities. A reconciliation of reported net income attributable to Hess Corporation (U.S. GAAP) to adjusted net income, and a reconciliation of net cash provided by (used in) operating activities (U.S. GAAP) to net cash provided by (used in) operating activities before changes in operating assets and liabilities are provided in the release.

Cautionary Note to Investors

We use certain terms in this release relating to resources other than proved reserves, such as unproved reserves or resources. Investors are urged to consider closely the oil and gas disclosures in Hess Corporation's Form 10-K, File No. 1-1204, available from Hess Corporation, 1185 Avenue of the Americas, New York, New York 10036 c/o Corporate Secretary and on our website at www.hess.com. You can also obtain this form from the SEC on the EDGAR system.
